Model No: RCX

2 Channel Transmitter and Receiver Set

This product is designed to be simple and easy to use. It has simple wiring connections and can be used in a variety of applications. Primarily, this product can be used to remote control your car, garage door, home alarm system, or your electric gate. The list of items you can interface into is almost endless.

The unit is supplied with 2, dual button remote controls which have an operating range of approximately 300 metres (line of sight – subject to environmental conditions).

The remote controls for this unit operate using code hopping technology. This is otherwise known as anti code grabbing or anti scanning type. This leading-edge technology prevents unauthorised copying of your remote control. This technology sends a unique and different code each time any of the remote control buttons are pressed.

Features

- 1 Second (Momentary) Negative Outputs for Each Channel
- Separate Latched Negative Output for Channel 1
- Flashing 12V LED Output for Channel 1, i.e- Flashes when the Button is Pressed, Stops when it is Pressed Again
- Can Store up to 15 Remote Controls in Total
