

# Metal Roof Mount with 1.5m Mast for ISP (Internet) Satellite Dishes 13MM-SM22

The SM22 is a 1.5m high ISP satellite dish/antenna mount suitable for use on pitched or flat metal roofs or concrete pads. The 1.5m mast allows for higher mounting of the antenna to clear line of sight obstructions as well as keeping the antenna away from radiating heat from the mounting surface. The mast is designed to allow Gen 3 internet reception antennas coupled with Matchmasters SM25 base adaptor to simply sleeve over, rotate to align the dish and lock into place. With an outside diameter of 44.5mm, the SM22 is suited to many communications and cellular antennas for a stable and durable installation.

## Features and Benefits

- » 1.5m x 44.5mm outside diameter heavy-duty ISP dish or antenna mount for metal roofs and concrete pads
- » Install on pitched or flat surfaces with telescoping support arms for ease of installation
- » 1.5m mast height to improve line of sight and minimise heat radiation from the mounting surface affecting the operation of the active antenna
- » Made from high-quality galvabond steel
- » 44.5mm OD, perfectly matched to Matchmasters SM25 Gen 3 dish pole adaptor
- » Proudly made in Australia.
